

## Getting started guide

### How to access

- 1 At work?** Go straight to [bestpractice.bmj.com](https://bestpractice.bmj.com) from a hospital computer for instant access. The bottom of your screen will display the message 'Access provided by Department of Health and Human Services – Victoria'.
- 2 Off-site or at home?** Go to [clinicians.vic.gov.au](https://clinicians.vic.gov.au), login to your CHC account and click on the BMJ Best Practice link in the 'Guidelines and Point of Care' section of the homepage.
- 3 Create a BMJ Best Practice account for additional benefits like access to the mobile app and CME/CPD tracking.** Simply click the pink 'Complete your profile' button in the bottom right corner of the homepage and follow the prompts.

Search for a condition 

# All the features you need when you need them

## Your BMJ Best Practice access includes:

- ✓ 1000+ topics covering the most commonly encountered conditions in the hospital setting
- ✓ A practical, action-oriented user interface for quick clinical answers
- ✓ Unique differential diagnosis tables and step-by-step treatment algorithms
- ✓ A top-rated, award-winning app that works offline for anytime, anywhere access
- ✓ 6000+ international and Australasian diagnostic and treatment guidelines, and integrated drug databases
- ✓ CPD tracking functionality allowing you to earn points with major Australasian colleges
- ✓ Medical calculators, procedural videos, patient leaflets, evidence from Cochrane Clinical Answers, Important Update visual alerts and more.

## Available within BMJ Best Practice Comorbidities Manager

- ✓ The Comorbidities Manager supports holistic treatment by addressing acute conditions alongside existing comorbidities
- ✓ Choose from common, high-cost comorbidities to generate an instant, tailored treatment plan
- ✓ Improved care quality leads to better outcomes, shorter hospital stays, and fewer readmissions.

1. Click on 'Your Profile' in the navigation menu and select 'Comorbidities Manager' from the list.

2. Select the acute topic you would like to explore. We are adding more topics to this list all the time, so keep checking back for updates.

3. Navigate to the 'Treatment algorithm' section of your chosen acute topic. The pink C+ symbol highlights that the Comorbidities Manager is available for this topic.

4. Select from a list of common comorbidities. You can select as many comorbidities as you like. You will see the pink C+ symbol when a treatment option may be impacted by the comorbidities that have been selected.

## Follow these steps to use:

1. Click on 'Your Profile' in the navigation menu and select 'Comorbidities Manager' from the list.
2. Select the acute topic you would like to explore. We are adding more topics to this list all the time, so keep checking back for updates.
3. Navigate to the 'Treatment algorithm' section of your chosen acute topic. The pink C+ symbol highlights that the Comorbidities Manager is available for this topic.
4. Select from a list of common comorbidities. You can select as many comorbidities as you like. You will see the pink C+ symbol when a treatment option may be impacted by the comorbidities that have been selected.
