

Martindale's ADR Checker

The authoritative source in
managing adverse drug reactions.

With information on ADRs for more than 1600 drugs used internationally, Martindale's ADR Checker ensures quick decision-making at the point of care.

Martindale's ADR Checker provides concise clinical management advice with a severity flag system to support health professionals when managing patients with adverse drug reactions. Answers can be found quickly, summarised by frequency, age and route. Further detail is available through in-depth ADR Profiles in Martindale: The Complete Drug Reference.
